ABOUT ME

Hello, I'm self-taught mainly in frontend web development. I also have a great interest in backend development, crochet and nature. I like collaboration and continuous learning. I have worked on collaborative projects and have experience using vue and react to build web interfaces.

EXPERIENCE

Software engineer

- Training contract as a software engineer using React.js, Node.js, MongoDB.

Frontend developer

- Refactoring of Barraza investors in which reactive sections of the dashboard were added using Vue.js

Frontend developer

- Creation of website for Barraza Investors, a family investment fund, in which external stock APIs were consulted to calculate profit percentages using vanilla javascript.

EDUCATION

Ademass / Gogodev

- Vue 3 professional course
- Typescript course

Udemy

- Basic CSS + Introduction to flexbox

FreeCodeCamp

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Back End Development and APIs
- Git and github course from scratch
